

DCM Whitepaper

Official DCM Whitepaper V1

Introduction To DCM

Throughout the COVID-19 pandemic, Bitcoin's value has drastically increased by 554% since the beginning of 2020 and by 352% YoY. These are far beyond the stock market and most any other asset class. In turn, this has led many investors to gravitate toward Bitcoin as a form of investment, further fueling price rises through a positive feedback loop. As the below figure highlights, while some individuals acquire Bitcoin via exchanges, many have opted to use physical ATMs, which take in cash and transfer Bitcoin to digital wallets.

There are currently more than 30,000 Bitcoin ATMs in operation around the world. That's a 100% increase from last year. Here's the problem, what if you don't trade Bitcoin? Then you are still forced to switch over your existing coin to Bitcoin, taking away the convenience factor of your withdrawal.

At DCM, we created software capable of doing this for you, making it possible to withdraw the dollar value of any coin contents by transferring it over the blockchain into Bitcoin for withdrawal to physical cash at any time quickly and conveniently. A DCTM is not the same as an automated teller machine (ATM) that allows bank customers to withdraw, deposit, or transfer funds in their bank account. Instead, Digital currency teller machines produce blockchain-based transactions that send cryptocurrencies to the user's digital wallet And turn the contents of a user's wallet into cash in hand. Often via the use of a QR code.

We could have sold this software instantly, but we chose to hold onto our brainchild and try to make it work ourselves and create our own company without paying anybody millions of dollars. We will launch the DCM token to gain funds to purchase 250 programmable teller machines to start our business. In return, we will reward our holders with 5% percent of total profit from DCM being used to pump the DCM chart once a month and increase the gains of those who help us bring our vision to life. We have already secured partnerships with multiple chains to ensure all DCTM's we can acquire and will not stop looking to expand our collaborations. If we can gain the necessary funds and factor in that the business locations are piggybacked off partnered establishments and require little to no overhead, it's easy to see the profit margins are high and the risk is low. If we can acquire and place all 250 DCTM's, we estimate our business evaluation at approx. Six million dollars by the end of 2022.

We expect to profit over 3 million dollars in 2022 alone starting year permitting schedule is kept, and goals are reached.

Introduction continues....

We plan to start a telegram group (DCM official) to inform the BSC community of our vision and goals. To gain like-minded individuals and support from investors, to see the potential for success and growth in our use case company.

We will hold a humble 100 BNB private sale on the platform to acquire funds to market our token our brand and acquire our first 5 DCTM machines.

After programming, We will partner with collaborators, take pictures and videos to share with our community and our investors to help with the large-scale marketing planned to get us from Our private sale into our presale- 150-300 BNB, respectively. Platform: Pinksale KYC Pinksale potentially with audit company before.

After completing the presale, we plan to move into the launch quickly in a timely matter to avoid losing any of the anticipations and ensure FOMO among the rest of the BSC community.

Once launched, we will use a portion of the marketing development wallet to purchase another five terminals as soon as it is safe and healthy enough to do so until we have reached 250 machines.

Once 250 machines are owned and installed with a conservative estimate. We can expect approximately 3000 USD profit from each DCM unit monthly. (Projected estimate, not a promise could be more could be less) 10% of all profit made will go directly into the DCM tokens chart. 5% of all profit will go to the marketing of the DCM token.

With this roadmap and successful completion of goals, we can create a thriving and profitable business in a growing and lucrative field. We hope you see the potential and would be charmed if you choose to believe in us and help us start to make this a reality.

Tokenomics

Total Supply

2,000,000,000

Private Sale 1BNB = 2,666,666.67

Presale Sale 1BNB = 2,500,000

Audit

We believe in investor safety and complete transparency. We have had a Smart contract audit completed already. A secondary audit will also be performed after launch on the mainnet. Attached below is our smart contract for anyone who would like to have a look. It is also pinned earlier in saved messages.
